AJITHKUMAR V

React.js Developer | Frontend Developer | React Native | TypeScript | JavaScript | Redux
Chennai, Tamil Nadu | +91 8072086115 | ajithkumar.ajee@gmail.com
LinkedIn: linkedin.com/in/ajithkumar-reactdev

Professional Summary

React.js Developer with **4.5+ years of experience** building scalable web and mobile applications using React, React Native, TypeScript, and JavaScript. Experienced in developing reusable UI components, integrating **RESTful and GraphQL APIs**, implementing state management with Redux and Context API, and improving application performance through **lazy loading and code splitting**. Experienced in owning features end-to-end within **Agile/Scrum** teams, including development, testing, deployment, and production support. Contributed to **microfrontend architecture**, cross-platform mobile applications, and Android release management.

Technical Skills

- Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS
- Frameworks: React.js, React Native
- State Management: Redux, Context API
- Backend & APIs: Node.js, Prisma, PostgreSQL, RESTful APIs, GraphQL, Axios
- Testing: React Testing Library
- Tools: Git, GitHub, GitHub Copilot, Vite, npm, VS Code
- UI Libraries: KendoReact, Ant Design (Antd), NativeBase
- Mobile: CodePush, Firebase Cloud Messaging (FCM), Google Play Console
- Concepts: Reusable Components, Responsive Design, Performance Optimization, Lazy Loading, Code Splitting, CI/CD, Agile/Scrum

Professional Experience

Software Engineer | Softura Private Limited | Oct 2024 – Aug 2026

- Developed and maintained enterprise web applications using React.js, TypeScript, JavaScript, HTML5, and SCSS.
- Built reusable UI components to improve consistency and simplify application maintenance.
- Integrated RESTful APIs to fetch, process, and manage business data across enterprise applications.
- Implemented Redux and Context API for predictable application state management.
- Reduced page load time by 20% through lazy loading and code splitting.
- Leveraged GitHub Copilot to improve productivity, reducing repetitive coding effort by 30%.
- Collaborated with designers, backend developers, and QA engineers in Agile/Scrum environments.

Software Engineer | Vertace Consultants / Naduvan Technologies | Dec 2021 – Sep 2024

- Built enterprise web applications to streamline internal business operations using React.js, JavaScript, HTML5, and CSS3.
- Developed and maintained cross-platform mobile applications using React Native.
- Developed reusable React components and integrated RESTful and GraphQL APIs based on project requirements.
- Managed application state using Redux and improved overall application responsiveness.
- Managed 10+ Android application releases through Google Play Console, including versioning, production deployment, and release management.

Key Projects

- MyKomatsu – Fleet Management Portal: Developed reusable React components, integrated GraphQL APIs, improved application performance by 20%, and contributed to a microfrontend architecture.
- ePass Android App & Website: Developed features for ePass verification, QR code scanning, and real-time data synchronization across web and mobile applications used by 10K+ verifications/day.
- Nokkam Android App: Developed online examination features, question management, and analytics for 100K+ students.

Education

Bachelor of Engineering (Mechanical Engineering)
Karpagam Institute of Technology | 2013 – 2017
